Tuffcover wall graphics

CS Acrovyn by Design

Tuffcover Graphic Wall Protection

Transform spaces

Transform hospital, office, showroom, retail, museum and public spaces. Feature graphic walls and bespoke wall coverings have long been the staple of good architectural design, but with the common use of graphic wallpapers comes damage, dirt and disrepair.

Latest technology

Displayways Tuffcover range has a solution. Acrovyn By Design® Wall Coverings enable you to protect your walls and dress them at the same time. Graphics and photo quality images are embedded within a tough impact resistant covering designed specifically to prevent damage. Your feature walls can now stand up to daily wear and tear and can be easily cleaned.

Digital imaging

The digital image is printed using the latest UV Curing technology combined with Acrovyn media that is designed to protect hospital walls from the damage caused by trolleys and daily cleaning. Displayways and Construction Specialties, the manufacturers of Acrovyn, have developed an ink and media combination that provides incredibly durable, high quality, full colour printed wall coverings.

The ultimate in durability

Our Tuffcover range is engineered for lasting resistance to heavy use and regular cleaning. Once you have experienced the practicality of Acrovyn By Design® wallcoverings – nothing else will do. A Tuffcover wall incorporating graphics of your own design is incredibly long lasting and will not wear away.

Why Acrovyn by design?

Renowned for its durability and wide range of uses Acrovyn® protects interior walls, doors and corners against damage from pedestrian and wheeled traffic.

- Protect interior walls and use graphics at the same time
- Create visual experiences for your visitors
- Transform healthcare, showroom, restaurant, retail and museum environments
- Embed any photo, graphic, artwork or branding
- Revitalise existing rooms, corridors and public spaces
- Eliminate high maintenance costs and repairs
- Promote your brand and protect your surfaces
- Free from PVC, PBTs and other harmful additives
- The only limit is your creativity
